

# FHR

## FRAC HIT RESTORATION

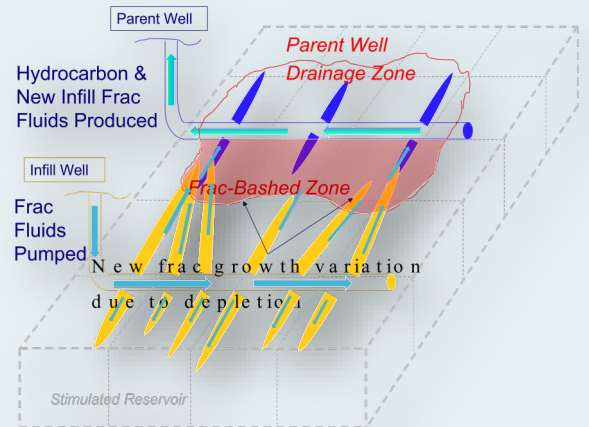

FHR removes damage from offset development, increases production and adds reserves

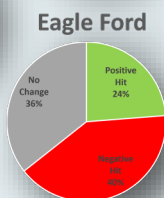

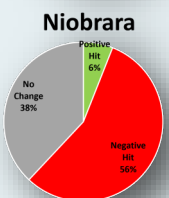

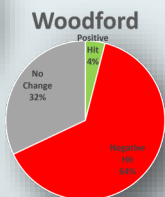

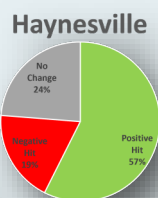

### Frac-Hit Indicators:

- 1) Pressure spikes
- 2) Increased water rates
- 3) Decreased hydrocarbon production

Call us to discuss FHR frac-hit restoration

FHR Frac Hit Restoration is a service developed and offered by Flex-Chem using a patented fluid technology to restore productivity to wells impacted by offset development.
